### Inspector Comment

06/24/2015: No significant change observed. 6/19/2014: No significant change observed.

08/13/2013: Pump has been removed. A larger pocket erosion has been found at the erosion site.

08/07/2012: The erosion is immediately upstream of a river bend. Dense vegetation is visible at the erosion site. [2015 Site ID:RD0544U01RM49.67]

### Inspector Comment

06/25/2015: No significant change observed. 07/02/2014: No significant change observed. 08/20/2013: No significant change observed.

08/07/2012: The site was first reported in 2012 spring levee inspection report. The data were estimated as the site is underneath a irrigation pump station and inaccessible by boat or land survey. It?s possible the pump station played a role in the erosion. [2015 Site ID:RD0544U02RM33.21]

#### Inspector Comment

06/25/2015: The site was discovered during the boat survey. Irrigation pipe leakage caused the soil to sink at the upper levee shoulder. The lower part of the levee is protected by riprap rocks. The irrigation pump was operating at the site. [2015 Site ID:RD0544U02RM33]
